The Central Valley Regional Water Quality Control Board (Central Valley Water Board) requires individual dischargers to conduct monitoring within the Sacramento-San Joaquin Delta (Delta) and tributary waters in the vicinity of their discharge, known as ambient or receiving water quality monitoring. In an effort to evaluate the current conditions and impacts of waste discharges on Delta waters, a coordinated ambient monitoring effort known as the Delta Regional Monitoring Program (Delta RMP) is currently under development.

The tentative Order proposes amendments to 15 individual Waste Discharge Requirements for NPDES dischargers that discharge to the Delta. The amendment will allow dischargers to participate in the Delta RMP in lieu of conducting their current individual receiving water monitoring programs. The basis for the proposed amendments to the individual Orders are described in the tentative Order and the revisions are shown in Attachments A through O in underline/strikethrough format.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting scheduled for:

DATE: 9/10 October 2014  
TIME: 9:00 a.m.  
PLACE: Central Valley Regional Water Quality Control Board Room  
11020 Sun Center Drive, #200  
Rancho Cordova, CA 95670

Only designated parties will have these rights: to call and examine witnesses; to introduce exhibits; to cross-examine opposing witnesses; to impeach any witness; and to rebut the evidence against him or her.
